EDUCATION

SRM Institute of Science and Technology

Kattankulathur, India

Bachelor of Technology in Computer Science Engineering • CGPA: 9.06/10.0

Expected May 2026

- Relevant coursework: Data Structures, Database Management Systems, Operating Systems, Computer Networks, Cloud Computing

TECHNICAL SKILLS

Programming Languages: Python, SQL, Java, C++, Bash

Frameworks & Libraries: FastAPI, Next.js, React, SQLAlchemy, pandas, NumPy

Cloud & DevOps: AWS (EC2, S3, RDS, IAM), Docker, Kubernetes, Terraform, GitHub Actions, Jenkins

Databases & Tools: PostgreSQL, Supabase, FAISS, Git, Prometheus, Grafana, Linux

EXPERIENCE

Artificial Intelligence Intern

May 2025 – July 2025

Deep Algorithms Solutions

Remote

- Completed learning modules on **CNNs** and **Mamba models**, and applied them in small-scale benchmarking experiments.
- Built a **U-Net pipeline** for brain MRI tumor segmentation (256×256 input), using a custom batch generator to avoid RAM issues; achieved Dice ≈ 0.74 and IoU ≈ 0.71 .
- Implemented **Transformer-based experiments** (IMDb sentiment classification and Vision Transformer prototyping on CIFAR-10) to compare model performance.

PROJECTS

CineReads | *FastAPI, Docker, Kubernetes, Terraform, Prometheus, Jenkins* | **Live Demo** Jul 2025 – Oct 2025

- Developed a movie-to-book recommendation platform using **GPT-4** and external APIs, built as modular microservices with FastAPI.
- Implemented a file-based caching system achieving an **85% hit rate**, cutting API costs by **70%** and sustaining **96.9% success** at **300 concurrent users** during load testing.
- Automated multi-cloud provisioning via **Terraform** (AWS and DigitalOcean), cutting infrastructure costs by **46%** through Lambda-based EC2 scheduling.
- Configured **Jenkins** on AWS EC2 for CI orchestration and deployment coordination, integrated with GitHub Actions workflows.
- Orchestrated containerized deployments with **Docker and Kubernetes**; implemented observability using **Prometheus** and **Grafana** dashboards.

TicketPilot | *FastAPI, Next.js, PostgreSQL, Supabase, FAISS, LLM* | **Live Demo**

Sep 2025 – Ongoing

- Engineered a **multi-tenant** customer support assistant using **FAISS** for semantic retrieval, enabling context-aware and cited responses powered by LLMs.
- Designed and debugged backend APIs with **PostgreSQL RLS**-based role control, ensuring secure data isolation across Admin, Rep, and Customer tenants.
- Integrated CI/CD via **GitHub Actions**, automating tests and rollouts to Vercel/Render for **99% uptime** reliability.

ScrubPy | *Python, pandas, scikit-learn, LLM* | **Published Link**

Feb 2025 – Sep 2025

- Developed a **Python library** for automated CSV cleaning and validation, improving preprocessing accuracy for data science workflows.
- Integrated a **Mistral LLM** for selective data enrichment to preserve privacy and optimize runtime.
- Published on PyPI with early traction (**30+ downloads** within the first month).

ACHIEVEMENTS / CERTIFICATIONS

- Cisco Networking Academy — Ethical Hacking (2025)
- AWS Academy Graduate — Cloud Foundations (2024)
- Open Source Contributor — FOSSHACK 2024 & 2025
- Published Python library on PyPI — 30+ downloads in first month
